Why Thousands of Aftershocks of a 1959 Earthquake Just ...

The 1959 quake killed 28 people, most in the Madison River Canyon east of the lake. But the lake itself was heavily affected by the 7.3 quake. The epicenter of the quake was actually closer to the east end of the lake than to either the canyon where so many people were killed, or the dam at the west end of the lake. And it hit hard.

Night of Disaster: Remembering the 1959 Hebgen Lake Earthquake

At 11:37 p.m. on August 17, 1959, a magnitude 7.5 earthquake rocked Montana's Yellowstone country. In an instant, an entire mountainside fractured and thundered down onto the sites of unsuspecting campers.

The 1959 Yellowstone Earthquake by Larry E. Morris

An earthquake of magnitude 7.3 at Hebgen Lake, Montana, on August 18, 1959, made quite an impact on the West Yellowstone part of Yellowstone National Park. New geysers erupted and massive slumping caused large cracks in the ground from which steam emitted. Many hot springs became muddy.
