**CSS3 Tutorial - An Ultimate Guide for Beginners**  
Cascading Style Sheets (CSS) is a stylesheet language used to describe the presentation of a document written in HTML or XML (including XML dialects such as SVG, MathML or XHTML).CSS describes how elements should be rendered on screen, on paper, in speech, or on other media. CSS is among the core languages of the open web and is standardized across Web browsers according to W3C specifications.

**CSS: Cascading Style Sheets | MDN**  
A media query is composed of an optional media type and any number of media feature expressions. Multiple queries can be combined in various ways by using logical operators.Media queries are case-insensitive. A media query computes to true when the media type (if specified) matches the device on which a document is being displayed and all media feature expressions compute as true.
