### Metric System Measurement Conversions Answers

The metric system is an international basis of measurement based on a decimal system. It uses standard base units to name larger and smaller units. 9,148 Questions

### Answers about Metric System

Conversion between metric and standard units can be tricky since the units of distance, volume, area and temperature can seem rather arbitrary when compared to one another. Although the metric system (using SI units) is the standard system of measure in most parts of the world many countries still use at least some of their traditional units of measure.
