Wearable Ehealth Systems For Personalised

eHealth (also written e-health) is a relatively recent healthcare practice supported by electronic processes and communication, dating back to at least 1999. Usage of the term varies as it just not covers the "Internet medicine" as it was conceived during that time, but also covers "virtually everything related to computers and medicine". A study in 2005 found 51 unique definitions.

eHealth - Wikipedia
